

Set up a Bluetooth LE button - Model Z (x)

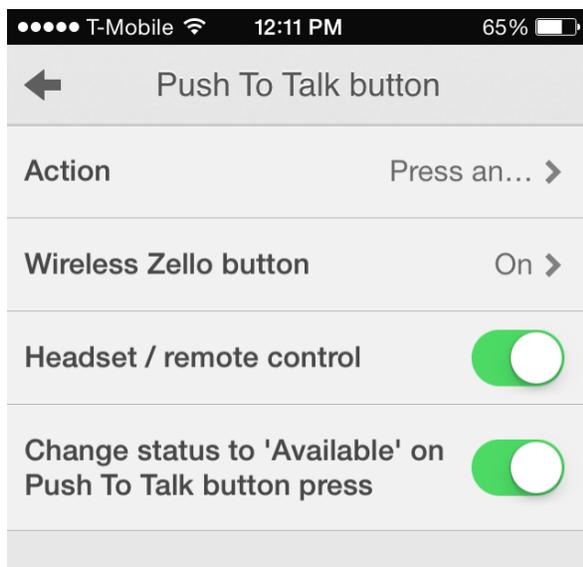

***Switch on the device

Please unscrew the bezel and find a tiny switch inside to turn on the device on before it will work. As stated in the instructions below, add the button to Zello before pairing it in the Bluetooth menu. And please switch on the Bluetooth of your smart phone.

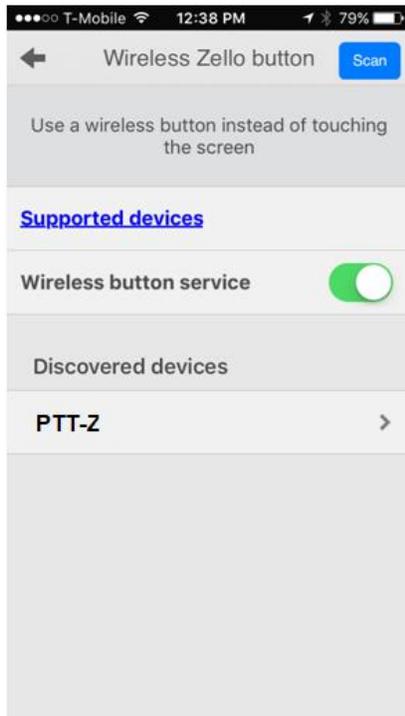

iOS

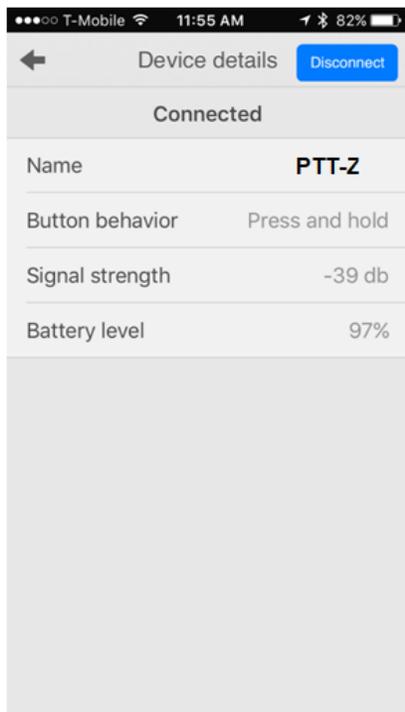

1. Open the Zello Menu > "Options" > "Push To Talk button" > "Wireless Zello button".

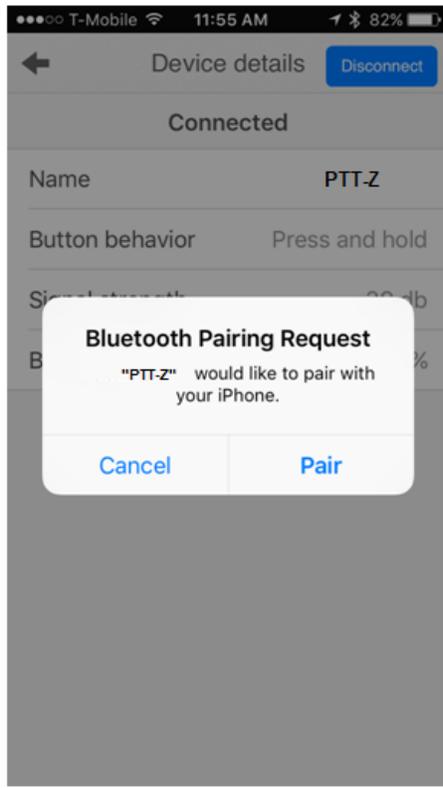

2. Select "Scan" at the top right to look for PTT-Z.

3. Find the device and connect it.

4. "Pair" with Bluetooth if prompted by the pop-up.

Android

Instructions to pair a Bluetooth LE button for Android are similar to iOS:

1. Open the Zello Menu > "Options" > "Push-to-talk buttons" > "+" (press the "+" in the lower right corner to add the PTT-Z device).
2. A message shows up: "Press Now".
3. Now press the PTT Button of your device (PTT-Z – your hardware button).
4. A new soft PTT button now shows up on your Android phone as "PTT-Z"
5. Click on "PTT-Z" to select it
6. Now the PTT-Z device is ready to use.

TIP

You can use Bluetooth LE only buttons along with any Bluetooth Low Energy headsets.

Known bugs:

If you connect the button to Bluetooth first on the iPhone, the button may go into a weird state and will not be recognized by Zello. To fix this state please:

1. Under iOS Bluetooth options, find the button, tap the info icon and "Forget this device"
2. Turn off Bluetooth on the devices that have been paired to the Bluetooth buttons
3. Delete the PTT-Z button app (if you have downloaded it)
4. Turn off the button
5. Turn the button back on
6. Press the PTT-Z button for about 10 seconds...
7. Turn on Bluetooth... but do not do anything else under Bluetooth
8. Open Zello > Menu > Options > Push to talk button > Wireless Zello button
9. Turn on Wireless button service
10. Scan, you should see the PTT-Z
11. A popup option will ask to pair the button with BT, press pair

Support

- Please visit www.nextav.net to see an installation video
- Please visit <https://www.facebook.com/NEXTAV.FAQ/> for product questions
- Or simply send our support an email support@nextav.net
- More reference is available on Zello's website. Please go to <https://zello.com/accessories/headsets-buttons-mics/> and search for NEXTAV for Zello. Please notice that Model Z (x) and Model U (x) are similar in functionality.
